Unmatched Flexibility and Expandability Guaranteed with Precise, Stable Performance

Innovative design is the key to the outstanding flexibility of the new BVM Series monitors from Sony.

Models which are divided into separate display and control units provide major improvements in both systemization and flexibility and are complemented by units of classic, stand-alone construction.

These BVM Series monitors are also operationally flexible in that they are readily customized to customer needs.

Desired functions are implemented with a wide range of optional decoder adapters which simply slot directly into the monitor rear panel.

The monitors are also packed with advanced features to enhance system operation:
a new Auto Alignment system for automatic monitor set-up,
monitor memory card for storage and transfer of user and monitor data.

Features for future use and ease of set-up are
all combined into this exciting range of monitors.

BVM Series monitors provide precise reproduction of video signals with a
resolution of over 1000TV lines in the highest grade monitor and close tolerance
SMPTE-C phosphors found in the entire line-up of the new BVM Series monitors.

The superior levels of performance are made possible by the use of
new CRTs that are designed by Sony and manufactured in its own production
facilities to the most exacting quality control standards.

The BVM Series—a true revolution in high performance video monitoring

◆ BVM-20E1U

◆ BVM-14E1U

◆ BVM-14E5U

◆ BKM-10R

FEATURES

SUPERB PICTURE REPRODUCTION

- Newly developed HR Trinitron® assures high resolution

20-inch display units*

BVM-20E1U	Super grade 1	More than 1000TV lines
BVM-20F1U	Grade 1	900TV lines

14-inch display units*

BVM-14E1U	Super grade 1	900TV lines
BVM-14F1U	Grade 1	800TV lines

14-inch stand-alone monitors

BVM-14E5U	Super grade 1	900TV lines
BVM-14F5U	Grade 1	800TV lines

*Display units are controlled with the control unit BKM-10R or BKM-11R.

- SMPTE-C standard phosphors
- Sony manufactured CRTs provide superb uniformity of performance
- Highly stable color temperature from beam current feedback circuitry

SYSTEM FLEXIBILITY

- New operating concept from divided type construction with separate display and control units

BVM-20E1U

Control unit BKM-10R

- Can be used as a conventional display combining separate type display with the BKM-10R control unit and the BKM-32H control unit attachment kit.

BVM-20E1U

- Desired functions achieved by inserting optional decoder adapters directly into the rear panel
- Memory card BKM-12Y available as an option for easy monitor set-up and Sony Interactive Status Reporting (ISR) System.
- RS-485 serial remote control and parallel remote control capability
- Supported by the Sony Interactive Status Reporting (ISR) system for remote monitor diagnosis
- Mountable into an EIA standard rack

Remote control over multiple display units

A maximum of 32 monitors can be controlled via RS-485 which enable mutual communication between the monitors and one BKM-10R control unit.

DECODER ADAPTERS

All inputs—other than the analog component (Y/R-Y/B-Y)/RGB inputs included as standards—can be customized to meet specific applications by fitting appropriate slot-in type modules. These decoder adapters—common throughout all models—are designed to be directly fitted into the rear panel, making board exchange quick and simple.

CONVENIENT OPERATING FEATURES

- Built-in auto alignment system for easy set-up
- Precise color temperature adjustment with an optional auto setup probe BKM-14L or a color analyzer via RS-232C interface (i.e. Minolta CA-100, Graseby SLS-9400, Philips PM-5639 and Thoma TF-6)

SPECIFICATIONS

20-inch (display units)		
BVM-20E1U		BVM-20F1U
General		
System	525 lines 60 fields or 625 lines 50 fields interlace	
Power requirements	AC 100 to 240V, 50/60Hz	
Power consumption	200W (max.), 2.0 to 1.7A/1.0 to 0.9A	
Dimensions	444 (W) x 414 (H) x 570 (D)mm (17 1/2 x 16 3/8 x 22 1/2 inches)	
Mass	37kg (81 lb 9 oz)	
CRT performance		
CRT type	HR Trinitron CRT with SMPTE-C phosphors AG pitch: 0.25mm, 90° deflection, Ø30.6 in-line gun Center resolution more than 1000TV lines	HR Trinitron CRT with SMPTE-C phosphors AG pitch: 0.30mm, 90° deflection, Ø30.6 in-line gun Center resolution 900TV lines
Screen size	Diagonal: 482mm (19 inches) Width: 386mm (15 1/4 inches) Height: 291mm (11 1/2 inches)	
Color temperature	PRESET: Factory adjusted for D65 white MANUAL control is also available, allowing alternative setting of color temperature	
Preset brightness	100cd / m ² (30ft-L) (when a 1Vp-p 100% white signal is input)	
Input performance		
Inputs	Loop-through BNC (x3)	
RGB	R/B	0.7Vp-p ±6dB, high impedance
	G	1.0Vp-p ±6dB, sync negative, high impedance
Analog component	Y	1.0Vp-p ±6dB, high impedance
	R-Y/B-Y	0.7Vp-p ±6dB, high impedance
External sync	Loop-through BNC (x1) 0.3 to 8Vp-p negative, high impedance	
Return loss	More than 46dB (7MHz when 75Ω terminated)	
Remote control inputs	Remote 1: Loop-through D-sub 9-pin (for RS-485 serial remote control) Remote 2: D-sub 9-pin	
ISR	D-sub 9-pin	
Video signal performance		
Differential gain	Within 2% for luminance from 0 to 100cd / m ² (0 to 30ft-L)	
Differential phase	Within 2° for luminance from 0 to 100cd / m ² (0 to 30ft-L)	
Frequency response	100Hz to 10MHz ±1dB	
DC restoration	Back porch type, back porch level: within 1% of peak luminance, 10 to 90% APL	
Synchronization		
AFC time	Fast mode: 0.5ms Normal mode: 2ms	
Horizontal hold	±500Hz (when AFC 0.5ms)	
Retrace time	Horizontal: Normal; within 1ms, Underscan; within 0.8ms Vertical: within 10μs	
Raster and picture performance		
Normal scan	5% over scan of the effective picture area	
Underscan	3% underscan of the effective picture area	
Stability of raster size	1% of picture height for a 10 to 90% APL change when 100% peak white is set to 100cd / m ² (30ft-L) brightness	
Linearity	Within 0.5% within circle centered on the screen with a diameter equal to the vertical height, 1% at any other point	
Convergence	Within 0.4mm within circle centered on the screen with a diameter equal to the vertical height, 0.7mm at any other point	
Operating conditions		
Operating temperature range	0 to 40°C (32 to 104°F) Optimum operating range 20 to 30°C (68 to 86°F)	
Humidity	0 to 90% non-condensing	
Altitude	Approx. 3,050m (10,000ft)
